

PROTECT THE OCEAN WE LOVE.

SAY NO TO PETROCHEMICAL SUNSCREENS!

*Petrochemical
sunscreens kill our
ocean & waterways.*

WHAT CAN YOU DO?

**Choose mineral
sunscreens** that
contain Zinc and
Titanium Dioxide.

Avoid these ingredients:

Oxybenzone • Avobenzone • Homosalate
Octinoxate • Octocrylene • Octisalate

Use Petrochemical-Free Sunscreen

Wear UV protection clothing, choose
shade and hats, avoid spray sunscreens –
too much goes into the air and impacts
the environment and your lungs.

*Petrochemicals refer to a class of products
derived from refining fossil fuels.*
